

NOVA & MAYA - Learning Companion

Printable Character Tokens

No need to cut up your book. Copy these pages or print the separate PDF, then cut along the dashed lines.

How to use the tokens

- Print one-sided at 100% size.
- Color is optional; the clear labels and character shapes remain usable when printed in grayscale.
- Cut along the dashed lines. An adult should help when scissors are needed.
- Use the NOVA token for Chapter 4: Hide and Seek.
- Keep the Maya and PIP tokens for later Learning Companion activities.
- For sturdier classroom sets, glue the tokens to card stock or laminate them after cutting.

Permission to copy

The purchaser may print or photocopy these token pages for use within one household or one classroom. The pages may not be resold, reposted online, or distributed as a standalone product.

A note about the artwork

These tokens use the NOVA, Maya, and PIP character designs. They are one-sided so families and classrooms do not need double-sided printer alignment.

NOVA Cut-Out Tokens

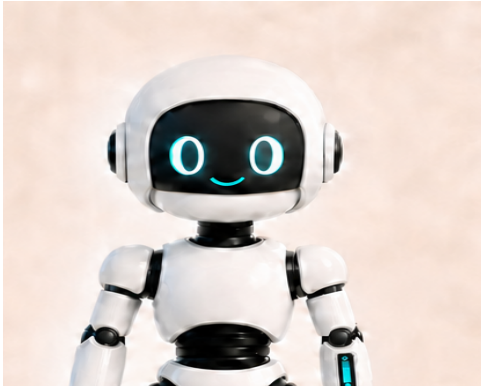

NOVA

You found me. I wondered whether you would keep looking.
